About Me

I am a Computer Science graduate from Brac University, skilled in full-stack web development, machine learning, and AI. Proficient in Python, C++, JavaScript, React, Laravel, TensorFlow, and PyTorch. I'm passionate about creating innovative and scalable solutions and learning new technologies.

Skills

Web Development: HTML5, CSS3, JavaScript, ReactJS, Angular, Vue, TypeScript, PHP, Laravel, Flask ,REST API, Node.js, Express.js,

Programming Languages: Python, C++, JavaScript

Databases: MySQL, MongoDB

Machine Learning & AI: TensorFlow, PyTorch, ML/DL, Artificial Intelligence, Simulation & Modeling, NLP, Text Classification

Tools & Platforms: Git/GitHub, Agile, SDLC, Cloud Computing, Vite, ESLint, Karma, Virtualization, Office 365, Windows, Linux

Other Skills: Problem Solving, Critical Thinking, Project Management, Networking, Troubleshooting

Projects

Complete Clinic Management System | [GitHub](#)

- A full-stack MERN clinic system with patient management, doctor scheduling, billing, and authentication.
- Tech stack: React.js, Tailwind CSS, MongoDB, and Node.js REST API.

Healthcare Landing Page | [GitHub](#)

- Designed and developed a responsive landing page for a healthcare platform, recreated from a Figma design file.
- Tech stack: Angular, TypeScript, HTML, CSS, JavaScript, Karma.

Event Management Interface | [GitHub](#)

- Designed and developed a user interface project focused on creating intuitive and visually appealing designs
- Tech stack: Vue, HTML, CSS, JavaScript

Klinik-24 | [GitHub](#)

- Developed a web application for a healthcare platform using a modern front-end setup
- Tech stack: React, TypeScript, Vite, ESLint, HTML, CSS, JavaScript

E-Commerce Medicine Store | [GitHub](#)

- Developed a medicine store web app with authentication and database integration
- Tech stack: PHP, Laravel, MySQL, HTML, CSS, JavaScript

Scripts | [GitHub](#)

- Built multiple scripts to automate mundane tasks and simplify everyday challenges i used to face
- Tech stack: Python, C++, JavaScript

Minimalistic Weather App | [GitHub](#)

- A real-time weather dashboard featuring a glassmorphic, minimalist frontend with live updates.
- Tech stack: Python, Flask, Open-Meteo API, and BigDataCloud..

Hate Speech Detection (AI/ML) | [GitHub](#)

- Built a hate speech classifier for social media platforms
- Algorithms: Logistic Regression, Naive Bayes
- Skills: Python, Machine Learning, NLP

Stock Market Prediction (Simulation & Modeling) | [GitHub](#)

- Implemented Monte Carlo Simulation for stock market trend prediction Focused on algorithm efficiency and forecasting
- Skills: Python, Simulation & Modeling

Single Image Super-Resolution (Thesis Project) | [GitHub](#)

- Implemented MSRGAN-based GAN model for image super-resolution
- Optimized for consumer-grade GPUs
- Skills: Deep Learning, GANs, TensorFlow, PyTorch

Road Safety Animation (2D Graphics) | [GitHub](#)

- Built a Python-based OpenGL 2D animation
- Used Midpoint Algorithms for rendering
- Tech stack: Python, PyOpenGL, GLUT, TypeScript

Snake Master (Game) | [GitHub](#)

- a modern, feature-rich twist on the classic Snake arcade game with power-ups, combos, multiple difficulties, skins, and local leaderboards.
- Tech Stack: Vanilla HTML5, CSS3, and JavaScript (Canvas API)

Education

Brac University

Bachelor's Degree in Computer Science and Engineering

CGPA - 3.43
05/2020 - 10/2024

Dhaka Imperial College

Higher Secondary Certificate

GPA - 3.83
09/2017 - 08/2019

Rajdhani Ideal School

Secondary School Certificate

GPA - 5.00
01/2008 - 07/2017

Experience

MASHALLAH Group.

System Engineer, IT

Basundhara R/A, Dhaka
08/2025 - Ongoing

- Optimized systems to reduce downtime and boost efficiency
- Managed IT operations and infrastructure for secure, reliable processes

G2i inc.

RLHF Code Reviewer

Florida, USA (Remote)
11/2024 - 07/2025

- Reviewed and optimized code submissions weekly for reinforcement learning applications
- Improved code quality standards resulting in 25% reduction in deployment issues in ML
